QUALITY CONTROL FOR YOU.

WHAT IS IT?

QC4U is our self-developed, state-of-the-art quality inspection program. Based on our long experience, we have adapted it exactly to our customers' needs. All data can be stored in the cloud and is entered via tablets on site (online and offline). The data is then accessible through a web portal – no matter where you are.

HOW IS IT DONE?

The program follows a straightforward workflow: from inspection order to reporting. The inspection parameters can be adjusted according to individual requirements, and the images are sorted according to the defect. All output is summarized in a comprehensive way.

WHO IS IT FOR?

Anyone looking for the quickest way from inspection to high-standard reporting

WHY BOTHER?

- Consistent and clear reporting
- Flexibility regarding input & output
- Random and periodical statistical analyses & graphics
- Real-time link with WMS possible
- One of the most advanced tools on the market
